

interturbine Group of Companies

MISSION STATEMENT

Interturbine is committed to the total support of the aerospace and high-tech industries and to meeting the challenges placed by customers operating capital intensive high technology transportation equipment within a highly demanding and ever changing environment.

Interturbine has become an industry leader in this field by providing customers with production and maintenance materials of the highest quality and performance delivered through the finest available ONE STOP SHOP SERVICE.

Interturbine's goal is to strive for excellence, delivering to all customers a total quality driven service, providing at any moment, to any destination worldwide, products within the shortest lead time and in the most cost effective manner.

All these individual company aims and objectives are supported by a dedicated management group and enthusiastic customer service teams operating from strategically placed international facilities offering pleasant and agreeable working environments to all staff.

Group Profile

The **Interturbine Group of Companies** is a center of excellence for the aerospace and high-tech industries and offers **TOTAL MATERIAL MANAGEMENT** for all services required for consumable materials such as:

- chemicals (lubricants, greases, cleaning products, hydraulic fluids, adhesives, coatings)
- composites and hot bonding equipment
- raw and semi-finished materials
- standard hardware
- cables and wires
- electronic components
- electrical and electromechanical materials
- tools and ground equipment
- other consumables and expendables

From a total of more than 3,000 supply sources a range of over 500,000 part numbers / specifications can be made available through a single point of contact (SPOC) at any time, 365 days a year, 7 days a week, 24 hours a day. Interturbine's innovative material service concept provides a **ONE STOP SOURCE** for immediate supply on call.

Value added services can reduce costs significantly as material can be provided on as need base, cut to length, semi-finished per task kitting or at any customized requirement.

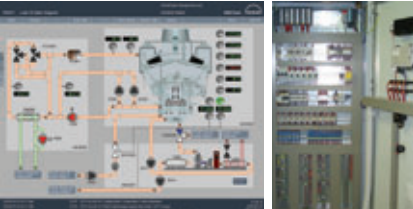

In addition, an innovative repair process has been developed to salvage worn, corroded or eroded engine and aircraft parts. The repair process is applicable to aluminium, magnesium and ferrous alloys as well as stainless steels.

For a most speedy and reliable supply Interturbine can manage the whole transportation process up to final destination by its own forwarding system.

In addition to normal supply contracts, Interturbine undertakes single-sourcing contracts, including inventory management up to total supply chain solutions.

Interturbine also has the capability to design, develop and manufacture products and solutions for the control and distribution of electrical power.

The inhouse recruitment agency supports the Interturbine Group as well as external companies in the aerospace and high-tech industries by providing qualified and motivated specialists. These personnel services are also offered worldwide.
