MCS 352B®

MCS 352B® is a viscous assembly lubricant for components and equipment designed to use Skydrol® aviation hydraulic fluids.

It is compatible with phosphate ester based hydraulic fluids and does not attack seals, hoses and other elastomeric compounds.

Approved by airframe manufacturers, MCS 352B® lubricates seals during assembly, preventing them from being damaged. It introduces no foreign material into the hydraulic system because it contains no silicone oils, nor any petroleum based products.

Interturbine Aviation Logistics GmbH exclusively supplies MCS 352B® in handy 160ML cans (drip flasks).
