Interturbine Advanced Logistics announce the opening of their new National Headquarters in Banyo

Banyo, September 2009

Aviation distribution company, Interturbine Advanced Logistics Pty Ltd. – part of the Interturbine Group of Companies – decided to call Queensland home and relocated its national operations from Wollongong, New South Wales, to Banyo close to the Brisbane Airport.

From the initial site selection in November 2008 Interturbine Advanced Logistics conducted a staged process to bring this complex operation to Banyo. The Customer Service and Management Team began working from the new offices during April 2009 with the inventory and full operation moving and re-establishing customer deliveries in just 3 days. This final move took place from the 28th until 31st August 2009.

Interturbine Advanced Logistics was attracted to Queensland because of the strong aviation and aerospace industry and fibre composite sector. Furthermore, the new office and warehouse are located very close to one of the major hubs in Australia.

Interturbine Advanced Logistics invested in the new facility in order to improve availability, service, communication and processing time. In addition, it is a very modern and innovative facility enabling Interturbine to double the stocks.

Therefore, Interturbine will enhance its capability as a significant partner in providing sourcing and supply chain solutions to the aviation and high technology industry sectors.

The Queensland Government has supported and encouraged this move as Interturbine's decision to move to Queensland will help to cement Queensland as Australia's Centre of Excellence platform in both the Aerospace and the highly technical Composite Industry groups.

Interturbine Advanced Logistics is the Australian arm of Interturbine Logistik GmbH who is recognized around the world as an approved supplier of 'CES' (consumables, expendables, standard hardware) materials such as standard hardware, raw and semi-finished metal products and materials, consumables, chemicals and composites to the aerospace industry, MROs and airlines, consolidating more than 500,000 part numbers from 2,500 sources.

Airframe manufacturers, Airbus, ATR, Dornier, Embraer, Eurocopter and Pilatus have appointed Interturbine as their approved fleet support distributor because of the high service attitude, fast response, global presence and worldwide material handling capability. Interturbine also supports requirements for other airframes i.e. Boeing, Bombardier, BAe, Dassault, SOCATA, EADS (PZL) and other.
